TIER 2 & 3 INTERVENTIONS

USATestprep's platform supports a variety of learning needs as well as intervention strategies. Here are some ways to support students who need more targeted and individualized interventions.

TIER 2

- USATestprep's pre-built (basic mode) or custom assessments, along with our integrated item bank, provide the flexibility to administer **diagnostic, formative, and summative assessments** to continually measure student progress and drive your instruction in the classroom.
- Class **progress reports** display data for individual students to represent each student's mastery level according to every standard.
  - Make sure to change the date range to track when interventions were put into place and whether the student is responding to intervention.

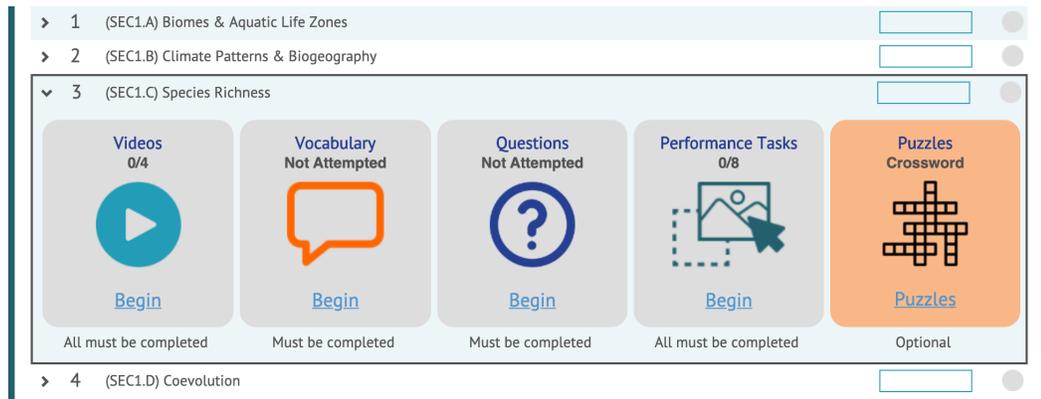

- The **Remediation** area provides actionable data and allows you to easily assign practice in individual areas of weakness (determined by the lowest-scoring standards per student) or areas of weakness based on the overall class's needs.
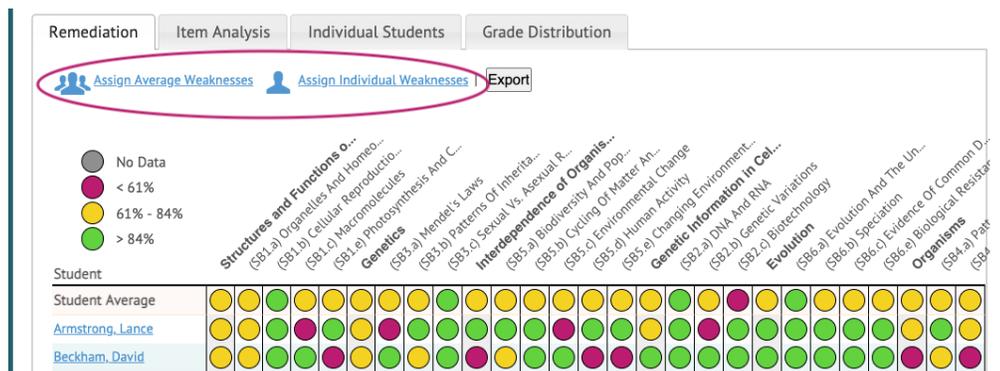

- **Multiple activity assignments** can be scheduled for a specific date range.
  - All assignments are aligned to your state standards and can consist of multiple activity types, such as practice questions, vocabulary sets, performance tasks, instructional videos, puzzles, and content-based games.
  - Minimum score requirements, multiple attempts, and the option for students to retry their missed items are all available settings when generating assignments.

TIER 3
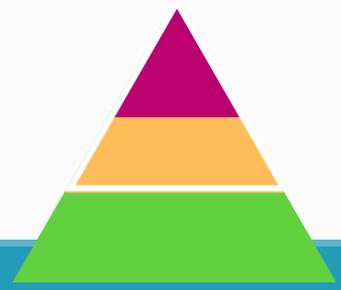

- Classes can be shared with an intervention/ support teacher for progress monitoring.
- **Self-directed learning** can be done by the students at any time through the student portal and is often used as part of intensive instruction in specific areas of need.
  - Students have access to a wealth of resources to improve their proficiency.
  - Students can work through a variety of exercises at their own pace in order to improve their Dot Rank and ultimately solidify their understanding of a concept.

>	1	(SEC1.A) Biomes & Aquatic Life Zones
>	2	(SEC1.B) Climate Patterns & Biogeography
⌄	3	(SEC1.C) Species Richness

Videos 0/4	Vocabulary Not Attempted	Questions Not Attempted	Performance Tasks 0/8	Puzzles Crossword
Begin	Begin	Begin	Begin	Puzzles
All must be completed	Must be completed	Must be completed	All must be completed	Optional

>	4	(SEC1.D) Coevolution

- When building an assessment, create it for the majority needs of your students. Then **duplicate the assessment** and swap out questions for less rigorous ones -- or edit the settings to reduce answer choices. You'll have a similar assessment covering the same standards, but the assessment will be tailored for specific students' needs.

SITE-WIDE ACCOMMODATIONS

es 🔊 Which of these sentences would best express the MAIN IDEA of a presentation about George Washington's life?

- **Spanish translation** is available for practice questions and vocabulary -- refer to the pink "es" icon.
- Spanish translation is available for USATestprep Generated Tests and assessments (if allowed in the settings) -- refer to the Español link at the top of the test/ assessment.
- **Audio read-aloud** is available for all questions, answer choices, and passages -- refer to the speaker icon. Text-to-speech may be disabled for assessments only.
- Students have the ability to **eliminate and reactive answer choices**.
- Students have a **highlighter** tool for assessments and USATP Generated Tests.
- Assessments and assignments can be created at various **difficulty levels**. For assigned practice questions, choose between beginner, random, and advanced. For assessments, custom mode allows you to sort questions by low and high difficulty.
